Projects

News Web Application
Tools : React.js,Node.js, Express.js ,Api , Github

Developed a web application that shows live global news, categorized into sections like sports, business, and entertainment. Uses external APIs to provide real-time updates, offering users an organized view of current events across various categories. The application ensures timely news delivery for an enhanced user experience.

cleaning Service Website
Tools : Html,Css,Javascript, Node.js, Express.js , Mongodb, Github

Created the TOWNY Cleaning Service web application with interactive features for booking home and office cleaning, pest control, painting, and carpentry services. Users can add services to their cart, book with inclusive pricing, and receive real-time updates. The admin interface offers dynamic order tracking, user management, and revenue monitoring, enhancing user engagement and streamlining business operations through efficient service management.

Weather website
Tools : Html,Css,Javascript, React.js, Redux, Github

Developed a weather check website using an API to provide detailed forecasts. The interactive site displays current weather conditions along with 15-day and 24-hour forecasts. Users can easily navigate through various weather data, ensuring a comprehensive view of upcoming conditions. The website features a user-friendly design for a seamless and informative weather-checking experience.
